

## Transferring your contacts from NetNerd (Easy Internet) to Very Good Email.

You do this by downloading a .vcf file from the old service and upload it to the new.

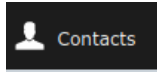

### **1 Download from the old.**

Log on to your account at <https://zeus9.easy-internet.co.uk:2096/>

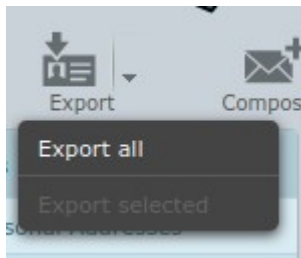

use you email address (e.g. [web@urc5.org.uk](mailto:web@urc5.org.uk)) and old password.

Goto you mail (Roudcube) interface.

Goto contacts

choose Export > Export all

this will download a file – contacts.vcf  
Save it on your computer.

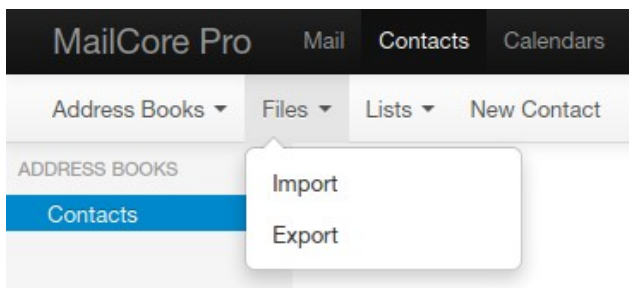

Log off if you like.

### **2 Download to the new.**

Log on to your account at <https://mail.verygoodemail.com>

use you email address (e.g. [web@urc5.org.uk](mailto:web@urc5.org.uk)) and new password (for most people this is the same as the old).

Goto Contacts, and choose Files > Import

Open the contacts.vcf file – and let it upload – for me it took about 3 mins to upload a list of 210 contacts. Groups or lists do not appear to transfer, although they are in the .vcf file.
